

# Integrated solution from Situational Awareness to Space Operations

Protecting space assets and  
operations for a better life on Earth

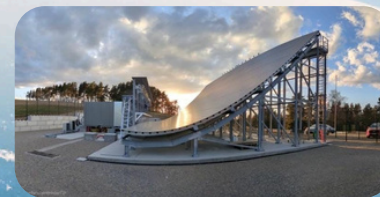

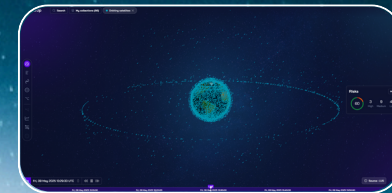

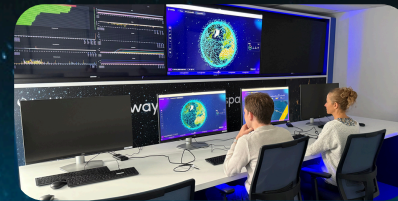

## Global Radar Network

SORASYS is a scalable ground-based radar network for space surveillance, offering centimeter-level accuracy in tracking objects in LEO.

## Hybrid digital solution

SYNAPSE is a data-agnostic interface using multi-sensor fusion to enhance SSA/SDA and enable real-time tracking, threat detection, and collision avoidance.

- ✓ Detect & track in real time
- ✓ Increase mission availability
- ✓ Reduce operating costs
- ✓ Improve lifetime and profitability
